

Trend of our present medical education is on the right track (Opposition)

DR. Sudip Ranjan Deb
Assistant professor
Department of Medicine
Dhaka Medical College

Changing Era of Medical Education

Professional medical education has not kept pace with the challenges of 21st century, largely because of fragmented, outdated, and static curricula that produce ill-equipped professionals.

[Lancet 2010; 376: 1923–58](#)

Pitfalls in our current medical education and examination system

- Under Graduate Medical Education
- Post Graduate Medical Education

Internship Training

Duration of the Internship

One Year/Two Years

Possible one year rotation in Community

Disorganized Postgraduate Education System
Ongoing three modalities of Postgraduate
training and examination system.

Honorary Medical Officer

Does it really work both ways?

Examination System

Is it biased?

Is it properly structured at every level?

No visible scope for evaluation of examiners.

Residency Program

Honorium

Training facility

Lack of Coordination between Departments

Post Graduate Training Opportunities

Limited

Not uniform

Not standardized

Training monitoring: Logbook

Teachers Training

Examiners' Evaluation

Transparent and reproducible system

Integrated Teaching

Exists in book or in theory

Practical Scenario.....???

Thank You
